Self-unloading mobile Solar Container. Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20" sea container. The efficient hydraulic system helps quickly prepare the Solar to work.

The Solar Container structure consists of six 400 [W] panels each, fixed to the fixing frame with a unique system that allows it to remain rigid not only during static operation, but also during transport. The Solar Container weighs only 420 [kg], which makes the installation easy to assemble and dismantle.

The solar container can remain in place during this time and takes up only a few parking spaces. When the winter season is over, it can quickly be used again to generate electricity. This is just one of many possible application scenarios for our mobile solar containers. Do you have something else in mind for the Containerphotovoltaik?
