2 ???· The solar project includes a 92 megawatt (MWac) solar farm split over two sites, totalling 186 hectares (ha) and an overhead 2.8km grid connection line to the existing Brechin Castle Substation.

Agrivoltaics can also mitigate one of the main criticisms often made of solar power--that solar farms "waste" vast tracts of agricultural land that could otherwise be used for food production. In reality, solar farms currently occupy only 0.15% of the UK's total land--not much compared to its 70% agricultural land.
