

Who is Solar Frontier Europe?

Solar Frontier Europe has been part of the Japanese Idemitsu Group since 2020 and has been part of its "Renewable Energy Division" since 2022. Its business mandate currently includes the operation of its own systems, support for existing customers and EMEA market observation and research.

How many MW of solar power are there in Estonia?

Since 2020 we have completed development and construction of more than 62 MW of solar capacity. We have more than 744 MW of ongoing projects around Estonia in different municipalities which will be completed by the end of 2024. We are also working to incorporate storage systems to provide electricity when the sun is not shining.

Why should you choose Solar Frontier Europe?

Our corporate philosophy, processes and available capital allow us to evaluate a wide range of innovative technologies to quickly bring the best to market. Solar Frontier Europe will contribute innovative and environmentally friendly solutions to the energy transition.

Why did the Solar Frontier Group restructure?

At the end of 2017, the Solar Frontier Group made a decision to carry out an organizational restructuring in order to be able to focus more on research and development in order to meet the increased customer expectations and the need for more attractive and efficient solutions in the field of renewable energy.
