Pair with solar panels and charge in as fast as 3-6 hours with 1x400W, 2x220W portable solar panels. With its MPPT (Maximum Power Point Tracking) smart algorithm, DELTA 2 can actively detect the voltage and current in real-time to reach the maximum power point with >98% efficiency. That means a more efficient charge than other brands.

The Apollo 5K is obviously not a good choice if you are shopping for a portable solar generator. It weighs 132lbs. It's a standby, not a portable solar generator. That said, there are a couple of options if you need to maneuver it around your home. The battery is removable, which halves the weight for easier movement,

If your average gas generator costs about \$1000 a similar output solar generator is going to cost you somewhere close to \$2000 - and maybe even more. Solar generators have lower operating costs in the long haul to offset that initial expense, but it still a pretty big hit to your bank account right away.
