Essentially, the solar leasing company is selling you power at a reduced rate, generated from the newly installed solar panels. Savings vary from 5%- 25% on monthly electricity bills. Here's where it gets really good: Your power rates with the leasing company are locked in for the life of the agreement. So when utility rates start to rise ...

Speaking of solar system in Indonesia, Quint Solar Indonesia Quint Solar Indonesia (QSI) has installed a solar power generation system centered on Japanese factories (on the roof) that are active in Indonesia. In addition to one-shot system sales, we can also support long-term leasing schemes that do not require initial investment.

Solar leases are a solar financing option that allows homeowners to use solar electricity without having to pay the upfront cost of installation. Instead, a homeowner makes a monthly lease payment to the solar company in exchange for the solar energy. The solar panels reduce your electricity bill, and the lease payment is designed to be lower than your pre-solar electric bill.
