

Balcony solar systems offer a simple way for apartment dwellers to generate their own renewable energy. Residents typically install one or two small solar panels (about 1m x 1.7m each) on their balcony railings, exterior walls, or terrace floors. These panels, usually 300-400 watts each, capture sunlight and convert it to electricity.

These measurement data are always obtained from an estimate based on an extrapolation, since Elia does not have all the measurement data at its disposal. Monitored capacity Elia always tries to ensure that its forecasts and the corresponding measurements reflect the latest situation with regard to installed solar-PV power capacity in the ...
