Solar power options. If you use a solar panel system -- also called a photovoltaic or PV system -- to produce electricity, you buy less electricity from the utility company and enjoy the benefits of renewable energy. The Department of Energy says most homes with solar panels get at least 40% of their energy from solar; that varies by house.

The inverter converts the electricity from direct current (DC) to alternating current (AC). The inverter typically lasts 15-20 years; you may have to replace the inverter at some point during the life span of the solar

panels, and that replacement cost is not included. Lastly, the inverter is wired directly into the breaker panel box.
