

It takes just five to eight years for a typical solar power system to pay for itself on a New Zealand home, experts say. But people who are high power users, or who work from home during the day could potentially benefit faster. Solar power has been in the news over the past week, due to the collapse of SolarZero.

Bison Energy New Zealand is also working on another greenfield development in the country -- the 35-MWp Somerton solar farm near Rakaia. Earlier this week, pullout tests for the tracking solar piles were performed at the site.
