Also known as Solar Renewable Energy Certificates, SRECs are redeemable cash credits issued each time a solar array produces 1,000 kWh (1 MWh) of solar electricity. This is different from being paid for the power you don't use, as this ...

Solar batteries help you get the most out of your solar energy system. The benefits include: Self-sufficiency - The more power you produce and store yourself, the less you have to rely on your utility company. This is becoming especially important as NJ utility companies transition to time-of-use rate models, which increase rates when demand for electricity is highest (typically in the ...

Includes Solar energy, Wind energy, & Biomass systems. "Biomass" means an agricultural crop, crop residue, or agricultural byproduct that is cultivated, harvested, or produced on the farm or directly obtained from a farm where it was cultivated, harvested, or produced, and which can be used to generate energy in a sustainable manner.

We see solar as a vital component of modern homes, contributing to Jersey's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs. If you anticipate significant price hikes, solar remains the most practical way to lock in a portion of your energy expenses ...
