

Can Brunei achieve 200 MWp of solar energy by 2025?

The Sultanate also targets achieving at least 200 MWp of solar energy capacity by 2025. This project also supports the Brunei Climate Change Secretariat's strategies to increase renewable energy adoption and reduce carbon emissions.

Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

What is Sinar & how will it impact Brunei?

The solar energy generated through Project SINAR will not only support the energy needs of Hengyi Industries' Petrochemical Refinery but also contribute to Brunei's national power grid when required, enhancing energy sustainability across the nation. Stage 1 of Project SINAR is targeted to be fully completed at the end of April 2025.

How will solar energy benefit Hengyi industries' petrochemical refinery?

"The solar energy generated through Project SINAR will not only support the energy needs of Hengyi Industries' petrochemical refinery, but will also contribute to Brunei's national power grid when required, enhancing energy sustainability across the nation," said Qiu Jianlin.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

Is PMB suitable for solar power?

The chairman added that preliminary analysis indicates PMB is highly suitable for harnessing solar power due to its abundant annual solar irradiance, earning a Grade A rating for Solar Energy Resource Richness. A sample solar PV panel displayed during the Project SINAR launched held at Hengyi's headquarters on PMB.

The Solar for Business Program was an initiative designed to support Victorian businesses to reduce their energy costs by accessing the benefits of renewable energy. This initiative helped decrease energy bills for ...

The Solar for Business Program will support the economic recovery of Victorian small businesses and the broader solar sector by delivering 15,000 solar PV rebates over the next three years. Minister for Solar Homes Lily D'Ambrosio today announced that applications are now open to any Victorian small business with between one and 20 employees ...

Eligible households can access an US\$926 (A\$1,400) rebate to install solar panels, an additional interest-free loan of the same value, and a further rebate of up to US\$664 (A\$1,000) to replace ...
