

How much power does Somalia have?

Current generation capacity is 106 megawatts, largely composed of expensive and pollutant diesel generators, though Somalia has great potential for solar and offshore wind power generation that can support a transition to green energy and reduce GHG emissions.

What is the Somali Petroleum Authority & how does it work?

In 2020, the government passed a petroleum law under which the Somali Petroleum Authority was established to regulate the industry and guide deals with international contractors. Licensing rounds have the potential to generate much greater revenue for Somalia and its regions.

Why did oil and gas companies leave Somalia?

Prior to the conflict and collapse of the government in 1991, international oil and gas majors had exploration agreements in Somalia, but they withdrew from the country because of the civil war. Energy firms like Royal Dutch Shell and ExxonMobil operated in Somalia before the government collapsed in 1991.

Is biomass a source of electricity in Somalia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Somalia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What regulations did Somalia pass in 2022?

In 2022, Somalia passed regulations related to the offshore licensing of oil and gas, legislation on an oil and gas revenue sharing framework between companies and the Somalia government, and legislation on revenue sharing between Federal Government of Somalia and Federal Member States.

How much oil does Somalia have?

Geo-seismic studies have shown that Somalia may have at least 30 billion barrels of oil and gas reserves, but these resources will take time to develop, as detailed exploration generally takes three to five years, and production can only begin afterward.

At Royal Global Energy, we elevate industry standards through innovative solutions engineered for the energy sector. Specializing in downstream oil supply, shipping logistics, and the production of refined petroleum products, we leverage our extensive expertise to navigate global energy markets.

Somalia Total Energy Consumption: Nuclear, Renewables and Other data was reported at 0.000 BTU qn in Dec 2022. This records an increase from the previous number of 0.000 BTU qn for Dec 2021. Somalia Total Energy Consumption: Nuclear, Renewables and Other data is updated yearly, averaging 0.000 BTU qn (Median) from Dec 1980 to 2022, with 43 observations.

This report provides an overview of the event "Climate Emergency Day on Accelerating Renewable Energy Transition in Somalia" that took place at Astaan TV Main Hall on Saturday, July 22, 2023, from 6:10 pm to 7:45 pm.
