The anticipated impact of this comprehensive policy revamp is significant. By creating a robust policy framework that responds to the evolving energy needs of the people of St. Vincent and the Grenadines, the country will increase its energy efficiency, reduce its dependence on imported fuels, and promote the adoption of renewable energy.

The Grenadines was also affected, as the lack of rainfall and very warm temperatures had all but dried up the limited supplies stored on the islands. On many occasions, water had to be taken by ferry, trucked, and then distributed on the islands. This further added strain to the already limited supply on the island of St. Vincent.
