Standby battery backup systems play a critical role in keeping essential operations functional in the event of a utility outage. Facilities like data centers, hospitals, airports, utilities, oil and gas facilities, and railways can't operate without 100 percent backup power reliability. Even standard commercial and manufacturing facilities have ...

Offline/Standby/Battery Backup. Offline UPS, also called standby UPS or battery backup, is a cost-effective choice. Better offline UPS systems switch to battery fast enough to prevent power anomalies and ride out short outages. An offline UPS protects against most spikes, but doesn't maintain perfect power during minor sags and surges.
