

## Stores energy for future use Wallis and Futuna

We are mainly active in New Caledonia and Wallis and Futuna through our retail activities. We are also a major player in the renewable electricity generation sector. We lead several community outreach initiatives in these countries.

In 1991, BNP Nouvelle-Calédonie, a subsidiary of BNP Paribas, established a subsidiary, Banque de Wallis-et-Futuna, in the territory. Two years earlier Banque Indosuez had closed its branch at Mata-Utu, leaving the territory without any bank. Following this, the Bank of Wallis-and-Futuna (BWF) with its head office in Wallis was created in 1991.

However run-of-the-river plants lack the capacity to store energy, a major drawback for most renewables. Furthermore, unlike large, dammed hydropower plant, production has been described as "unpredictable" due to the potential of a ...

Cuisine in Wallis and Futuna blends culinary influences from other Pacific islands such as French Polynesia, so one of our most popular island dishes is fresh fish salad. There are almost endless recipe variations for fish salad but the best-known features coconut milk with diced tomatoes, cucumbers, carrots, onions and lashings of lime. ...

Looking ahead, the future of chieftaincy in Wallis and Futuna will likely involve a blend of old and new. Chiefs will continue to play a significant role in the community, but their functions may evolve to better align with modern societal needs. The challenge will be to maintain the essence of traditional leadership while adapting to the ...

Factbook &gt; Countries &gt; Wallis and Futuna &gt; Energy. Electricity - production: NA kWh. Definition: This entry is the annual electricity generated expressed in kilowatt-hours. The discrepancy between the amount of electricity generated and/or imported and the amount consumed and/or exported is accounted for as loss in transmission and distribution.

This page presents a high-level insight into extreme events and how extreme events differ from mean climate. Extremes are often related to different physical processes than those that govern long-term means. While an average change in precipitation is primarily due to circulation changes, extremes are much more sensitive to
