

What is the stride project?

The STRIDE project aims to provide through knowledge transfer and development of planning tools, a comprehensive support for regional/local policy makers for the improvement of energy planning.

What is the energy transition in Poland?

Wholesale energy prices in Poland compared to other EU countries remain very high, and the economy's dependence on imported fossil fuels is growing rapidly. In the latest, seventh edition of the "Energy Transition in Poland" report, Forum Energii presents the state of transition play and a broader look at the overall process.

Does Poland have a helmsman for the energy transition?

The energy transition in Poland has no helmsman. There is no single centre to manage the process, so the changes taking place are chaotic. Poland has never offered a comprehensive vision for the decarbonisation of the economy or a plan to reduce dependence on energy resources imported from abroad.

EcoStride Energy is uniquely positioned to make a difference in renewable energy. With our deep knowledge of the renewable sector, including solar, biogas/biomass, hydropower, and BIPVs, we provide flexible solutions, from advisory services to full-scale project management. Our established partnerships with green funds enable us to offer ...

This represents another significant stride towards Poland's energy transition, a goal that EDPR is actively pursuing in all the markets where it operates. This large-scale photovoltaic plant, which is also the second largest in Poland, has nearly 308,000 bifacial panels that are capable of harnessing solar radiation from both sides and thus ...
