

Where can I find information about energy in Sudan?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Sudan on the IEA homepage. Find relevant information for Sudan on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How much does electricity cost in Sudan?

As for Ethiopia, Sudan imports electricity at a price of 4.5 cents/kilowatt . In August 2021, the Minister of Energy and Petroleum declared that the Sudanese energy sector needed urgent maintenance and restructuring at a cost of \$3 billion, another indicator of the dire financial needs of the sector .

How has the energy sector changed in Sudan?

There has been massive progress in Sudan's energy sector, especially the increase in renewable sources has improved the scenario of the population's energy deficit; according to a recent study, the number of people lacking access to electricity in Sudan decreased from 70% of the total population in 2010 to only 47% in 2019 (Khan et al., 2022).

Why is energy development important in Sudan?

Sudan faces many energy development challenges brought about by high electricity subsidy levels and climate-induced impacts on hydroelectric generation which has been decreasing at a rate of about 4% per year. Improving access to modern and affordable energy is a development priority for Sudan.

What is Sudan's Energy Strategy?

Accordingly, Sudan's key national energy strategy is increasing access to energy services, improving energy efficiency, and scaling up various renewable energy sources in the energy mix (Sudan National Report, 2019). Currently, there are several LHPs for electricity generation in Sudan.

What is the energy supply in Sudan?

The overall energy supply in Sudan is mainly produced from crude oil, hydroelectricity, biomass, and renewable energy sources such as wind, solar, and geothermal energy. As shown in Fig. 1 (a), the largest energy supplier is biomass, which contributes 52% of the total energy consumption in Sudan.
