

Sunculture solar products in today Turkmenistan

Who is sunculture?

Welcome to SunCulture At SunCulture, we strive to solve the biggest daily challenges of smallholder farmers. We use off-grid solar technology to provide our customers with reliable access to water, irrigation, lighting, and mobile charging, and we can do all of that with a single system.

Does SunCulture sell Agrosolar Irrigation Kits?

SunCulture, based in Nairobi, Kenya, sells the AgroSolar Irrigation Kit (ASIK), an entirely solar-powered drip irrigation system. SunCulture offers this product for farmers to make it easier and cheaper to grow a wide variety of crops.

Where is sunculture located?

The company started its operations in Uganda in 2022 and its headquarters is located in Kampala. For over ten years, SunCulture has been developing and commercialising solar irrigation systems in several African countries.

How does sunculture work?

With SunCulture, you can increase your crop yields by 300% and reduce your water usage by 80% with a simple push of a button. Yield 1x Up to 5 times Increase in yields Income Growth 1x Up to 10 times increase in income Our Pricing And Plans Effective & Flexible Pricing That Adapts Your Needs ClimateSmart Battery with RainMaker 2 System

Why should we support sunculture?

"By supporting SunCulture to scale up its business operations and reach more rural farmers, we are able to increase farmers' incomes, empower women, help farmers adapt to climate change and increase access to clean energy alternatives in the country," comments Tina Möller, Programme Manager at Nefco.

What is sunculture Middle Management Learning & Development?

The SunCulture Middle Management Learning and Development project, supported by the Water and Energy for Food Grand Challenge, is a Technical Assistance initiative aimed at developing the self and commercial leadership capacity of middle managers. These managers will need to take up increasingly strategic positions as SunCulture prepares for a Series B raise in 2022.

Many smallholder farmers have found a safe spot through the use of solar-powered tools. Solar equipment is preferred to overcome droughts because it requires minimum water delivery to crops. The solar products are advantageous to use for agriculture in arid regions like South Africa. 2. Easy on the environment

The technology around off-grid solar products has seen considerable development over the years, making

access to energy easier for millions of people in energy-starved regions. ... Most solar-powered water ...
