

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems, officials passed a set of safety and installation regulations in 2015.

What certifications does Sunfield energy have?

Since its inception in 2010, Sunfield Energy has provided lowest-cost clean energy to communities and commercial establishments throughout India. Certifications: IS 14286 : 2010 / IEC 61215 : 2005, IS/IEC 61730 (PART 1): 2004 & IS/ IEC 61730 (PART 2): 2004, IEC -61215, IEC-61730-1&2, IEC-61701 and PID

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory, which focuses on optimising clean energy use and production, Zhang believes expanding the use of natural gas poses major problems, especially in the city's older districts. "Many buildings and [much of the] infrastructure in Macao are outdated.

Since 2015, fossil fuels have accounted for about two-thirds of global greenhouse gas emissions, according to the European Environment Agency. To curb climate change and reach net zero emissions by 2050, countries and regions around the world are rushing to cut fossil fuels and boost clean energy usage.

Earlier this week the Tribune's reporter Monica Lamb-Yorski (MLY) reached out to Sunfield Energy Inc. for an interview regarding its proposed feasibility study for a solar project north of Williams Lake.. At Sunfield Energy we are committed to playing a pivotal role in making solar energy affordable and accessible to all. Our prime motive is to provide reliable and efficient systems that will give long term benefits to our customers. Today the solar power costs less to generate than the cheapest competing fossil fuels.

Shenzhen Sunfield New Energy Technology Co., Ltd is a High-end solar panel manufacturer/factory in Shenzhen, China since the year of 2015. Our main market is EU countries, Korea, Australia, Canada etc...

With the Sunfield solar strategy, we avoid at least 3,000 tonnes of emissions from carbon dioxide a year, equivalent to planting 140,000 trees. With robust and storable renewable electricity onsite, we have also excluded gas connections from Sunfield, acknowledging that solar generation is a far more renewable energy source than gas".
