

What is Sunseeker energy?

Sunseeker Energy considers that its solar technologies can provide an important contribution to helping address these issues. Sunseeker Energy was established in 2006, the founders having identified technological solutions and advancements that could be made when compared to existing solar power solutions that were available at that time.

What is a solar Sunseeker tracker?

The All-Weather SPG Solar SunSeeker Tracker is a single-axis tracker with a robust design, optimized for long-term reliability in all weather conditions--from high winds, hurricane zones, to snow regions.

What is the all-weather SPG solar Sunseeker tracker?

The All-Weather SPG Solar SunSeeker Tracker is a single-axis tracker with a robust design, optimized for long-term reliability in all weather conditions--from high winds, hurricane zones, to snow regions. This is SPG Solar's latest generation of the SunSeeker Tracker, further maximizing solar returns.

Is SPG solar Sunseeker scalable?

With over 40 MW installed nationwide, the SPG Solar SunSeeker is easily scalable through a modular power block design, creating efficiencies for the large and utility-scale solar system projects.

Physical electrical and systems inspection on all components of your solar system including all hardware and connections. Electrical characteristics tests using the latest technology. Check the inverter for correct operation and clean any air filters. Report any areas of concern, if minor it will be fixed at the time of service and documented. ...

Optional dual A/C with heat pump with power shedding system (Most Models) CO, LP and smoke detector; Winegard Air 360+ digital antenna; Gateway 4G Wi-Fi capability; Side-mounted solar prep connection (N/A with roof-mounted solar) Optional 190 Watt roof-mounted solar powered 12V charging system (in place of side-mounted charger prep) Exterior
