

Could large solar farms in the Sahara Desert redistribute solar power?

Large solar farms in the Sahara Desert could redistribute solar power generation potential locally as well as globally through disturbance of large-scale atmospheric teleconnections, according to simulations with an Earth system model.

Can large-scale solar farms influence atmospheric circulation in the Sahara Desert?

Our Earth system model simulations show that the envisioned large-scale solar farms in the Sahara Desert, if covering 20% or more of the area, can significantly influence atmospheric circulation and further induce cloud fraction and RSDS changes (summarized in Fig. 7) across other regions and seasons.

Did the Green Sahara increase land monsoon precipitation during middle Holocene?

Sun, W. et al. Northern Hemisphere land monsoon precipitation increased by the Green Sahara during middle Holocene. *Geophys. Res. Lett.* 46, 9870-9879 (2019).

Are solar farms causing unequal distribution of solar potential?

Although the impacts are modest on a global or continental scale, the potential inequalities resulting from the disturbance of hypothetical Sahara solar farms can still manifest in the unequal distribution of solar potential.

Are solar farms affected by Walker circulation changes?

The exception is Eastern Australia, where cloudier conditions are larger during December-January-February (DJF), implying an indirect response due to Walker circulation changes (explained below). Fig. 2: Seasonal shortwave radiation affected by Sahara solar farms.

6 reviews and 5 photos of SUN VOLT "When my solar was installed last year I was told Sunvolt would monitor my system and contact me if any issues. We got a few emails in the beginning then they quit sending them. In October this year while my system is not even a year old I realized I had 12 panels out. They came out once told me I needed a new cable.

2,760W Solar Array - eight solar panels each rated for 345W / 34.99Vmp ; Hydraulic lift system for easy adjustment to optimal array angle; Quick locking slide-outs that stop solar panel movement during panel deployment and travel mode
