

# Sustain energy solutions British Indian Ocean Territory

Can island nations build a greener and more resilient energy sector?

Based on our experience implementing USAID-funded energy programs in over 60 countries--including small islands in the Caribbean, South Asia, Africa, the Pacific, and the Philippines--we've seen first-hand how island nations can build a greener and more resilient energy sector. Below we outline some of these examples and recommendations.

Should small island developing states accelerate energy transition?

Considering the deepening global climate crisis, the urgent call for action to accelerate energy transition from Small Island Developing States (SIDS) has grown louder, especially since they are most vulnerable to the impacts of climate change.

How can off-grid energy solutions help remote island communities?

These examples show that off-grid energy solutions not only bring reliable energy to remote island communities, but they also help foster self-sufficiency, create income-generating opportunities, and decrease outlays for fuel.
