

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

How much oil does Syria produce a day?

Before the war, Syria's oil production averaged over 400,000 barrels per day (bpd) between 2008 and 2010. By May 2015, this had dropped to fewer than 25,000 bpd, according to the US Energy Information Administration but by 2023 production averaged approximately 91,000 bpd.

What's going on with Syria's oil & gas industry?

After nearly 14 years of civil war, triggered by now-ousted Syrian president Bashar al-Assad's brutal crackdown on pro-democracy protests, Syria stands at a pivotal crossroads. The conflict has left the nation deeply fragmented, with numerous questions about its future, including the fate of the country's oil and gas industry.

Will Syria's oil & gas output revive?

"Syria's oil and gas output could revive to an extent, with better security and waivers to international sanctions," he continued. While Syrians are optimistic about the future of their country following the fall of the Assad regime, the country faces uncertainty following the collapse of a government that controls every aspect of daily life.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

Does Syria have oil?

Although small compared to other Middle Eastern countries, Syria's oil exports accounted for roughly a quarter of government revenue in 2010. However, recent data from the World Bank revealed a 3.5 per cent annual decline in oil production, partly due to damage from earthquakes and ongoing conflict.

Sweetwater Energy | 2,487 LinkedIn. Green no longer comes at a premium | Sweetwater Energy's Sunburst technology is a disruptive platform technology that enables the biorefinery.
