

Does Syria have a nuclear power reactor?

The Syrian Arab Republic has no nuclear power reactor in operation, but according to energy planning studies, a nuclear power programme encompassing two nuclear reactors is anticipated to contribute to national electricity production by 2020-2025. 1. COUNTRY ENERGY OVERVIEW 1.1. Energy Information

What is the energy sector in Syria?

The energy sector is a robust component of domestic economic activities, and the main contributors in the Syrian energy sector are the Ministry of Petroleum and Mineral Resources, the Ministry of Electricity and the Atomic Energy Commission of the Syrian Arab Republic.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Should Syria consider a nuclear option for electricity generation?

The Syrian energy supply strategy recently highlighted the competitive role of the nuclear option in the future energy supply mix. There is acceptance and willingness to consider the nuclear option for electricity generation.

What is Syria's electricity policy?

The Syrian generation sector relies mainly upon fossil fuel, which has had a share above 80% of the electricity mix over the last two decades. For the future development of the electricity generation system, the Syrian electricity policy focuses on the following issues:

What is the organizational structure of the Syrian energy sector?

Figure 4 represents the organizational structure of the Syrian energy sector. The AECS is responsible for all activities related to peaceful applications of atomic energy in the fields of agriculture, medicine and industry. The AECS also represents the Syrian Arab Republic's membership in the IAEA and in other organizations.
