Higherwire We are excited to announce that we have created 18650 heat shrink sleeves with our logo! Since we repurpose 18650 cells for our battery assemblies, we have to deal with a lot of damaged heat shrink, tape, and other gunk that slows down the process and makes things a bit more difficult. After resleeving far too many cells to count, we decided to make our ...

You've probably noticed the Higherwire-branded trailer by now (you know, the one that's featured prominently on our main page) and you might be wondering how that ties into our mission to reduce the barriers to entry for renewable energy storage. What is it? We built a towable mobile power station out of a simple bike trailer and basic materials. It includes nearly ...

The City of Phoenix, renowned for its unwavering commitment to sustainability and renewable energy, recognizes the exceptional potential of Higher Wire's renewed battery solutions. As part of this contract, Higher Wire will provide its innovative battery systems for stationary applications at several local parks and integrate them within solar installations. The ...

18650's You might have noticed that much of our stock of many 18650 cells is running low or out. We're still analyzing cells! But a few things have conspired to keep us from updating stock. First, and this is a Big Deal - we're looking for a larger space to operate. We've been busy forging partnerships and building up our supply of recycled batteries, and our ...
