

Why is solar power important in Zambia?

Right now, Zambia mainly depends on hydropower, due to the large dams generating electricity in the country. Droughts made this electricity source less dependable and combined with the increase in electricity demand a new renewable source is desirable. The growth in solar power is therefore of great value and goes beyond just the energy sector.

Are there solar companies in Zambia?

The solar sector in Zambia hosts a variety of solar companies, operating in several business segments. These businesses vary from Solar Home Systems to utility scale developers. There are also international companies active in Zambia, mainly in the utility scale sector. Most offices of the companies in Zambia are located in Lusaka.

Will Zambia transition to solar energy in 2023?

In conclusion, Zambia's transition to solar energy in 2023 will demonstrate the country's dedication to sustainable growth and the quest for a greener future. The nation is illuminating the way to a greener, more robust energy landscape by utilizing the power of sunshine.

Who owns 50 MW of solar power in Zambia?

In 2022, the Southern, Western, and Luapula provinces of Zambia's Zambia Electricity Supply Corp. (ZESCO) have issued a call for tender for the development and construction of 50 MW of PV facilities, 90% of the infrastructure will be owned by the selected developer, and the other 10% will be held by the state-owned utility, ZESCO.

Does Zambia have a solar market?

The Zambian solar market is growing, although it is still relatively small in comparison with countries like Tanzania. 95% of the electricity supply in the country comes from hydropower, where less than 1% comes from other renewable sources. Since the electricity demand in Zambia is growing, there is much room for solar to grow as well.

How much electricity does Zambia produce a year?

The Zambian electricity grid has ready-made energy storage infrastructure at Kariba Dam. Kariba Dam typically stores approximately 5750 GWh of electrical energy or about 30% of Zambia's annual generation of 19,400 GWh in 2022.
