

Who financed Tunisia's first solar project?

The African Development Bank and the Sustainable Energy Fund for Africa (SEFA), in partnership with the International Finance Corporation and UAE's AMEA Power, today herald Tunisia's first privately-financed solar project.

Why should Tunisia invest in Kairouan solar?

The plant is central to Tunisia's strategy to reduce its reliance on natural gas. It aims to bolster the nation's renewable energy share to an ambitious 35% by 2030, thus the Kairouan Solar project is not just about power generation; it is about regional transformation.

How will a solar plant in Tunisia benefit from debt financing?

The 100-megawatt, \$86 million solar plant located in Tunisia's Kairouan governorate will benefit from up to \$26 million in debt financing from the African Development Bank, including \$13 million sourced from SEFA, a multi-donor fund that provides finance to unlock private sector investments in renewable energy and energy efficiency.

What is AMEA power doing in Tunisia?

AMEA Power's Chairman, Hussain Al Nowais, said: "We are delighted to reach financial close on this 120MW solar power plant in Tunisia, our first project in the country. This is a significant milestone for AMEA Power and for Tunisia, as it represents the largest solar project fully developed in the country to date.

How will Tunisia's Green Energy Initiative change the world?

This initiative is set to revolutionise the nation's energy scene by cutting power generation costs, significantly trimming greenhouse gas emissions by over 90,000 tons annually, and bolstering Tunisia's green transition. The partners signed project launch papers on Tuesday 26 September, at the government headquarters in Al Qasba, Tunis.

What is Sefa & how does it work in Tunisia?

This venture exemplifies our collective effort to bolster Tunisia's energy independence and fortify its green transition," Shonibare said. SEFA is a multi-donor Special Fund that provides catalytic finance to unlock private sector investments in renewable energy and energy efficiency.

Part of the inauguration of the "Chams Enfidha" solar energy station in Tunisia (Tunisian Ministry of Industry, Energy and Mines) Tunisia has inaugurated its first solar power station as part of the government's ambitious program to secure about 30 percent of its energy needs through renewable energies by 2030. Dubbed "Chams Enfidha," the station has the ...

The first floating solar photovoltaic plant in the MENA region, located at Lac 3 in Tunisia, began operations

on Saturday with the aim of covering part of the energy needs of the La Goulette neighbourhood. The plant, which covers an area of ...

Tunisia's ambitious plan to increase renewable energy production is geared toward reducing its overreliance on imported gas for its power generation that threatens its energy security. The Kairouan Solar ...

Progress at all five of the large solar photovoltaic concessions first launched in 2019 is an indication that Tunisia's renewable power sector may be moving forward despite extremely difficult political conditions. Scatec's farm-out of a stake in its two projects to Japan's Aeolus represents a major new commitment, backed by carbon credits along with debt financing.

A floating solar power plant goes into operation in Tunisia. The park is equipped with inverters and solar panels installed on the Tunis Lake, located between the Tunisian capital and the Gulf of Tunis. The plant is the result of a project developed since 2020 by the Qair Group, an independent power producer (IPP) based in Paris, France.

Conventional power plants still generate 97 per cent of power in Tunisia. However, there are plans to generate 30 per cent of Tunisia's power from renewable sources by 2030. The country's first solar power plant in Tozeur, at ...

FusionSolar est un leading fournisseur de solutions solaires innovantes en Tunisie, en partenariat avec des installateurs, des services publics et d'autres parties prenantes professionnels pour promouvoir l'utilisation durable et efficace de l'énergie renouvelable. Nous pouvons offrir des solutions solaires puissantes adaptées aux besoins de nos clients en Tunisie et au-delà;

Tunisia relies on imports for most of its energy sources, such as oil and natural gas, with thermal power generation accounting for the majority of domestic power generation capacity. The Government of Tunisia has an ambition to increase the renewable energy share to 35% of the country's energy mix by 2030 and is running a renewable energy ...

Tunisia is making waves in the green energy sector. The country is set to roll out its first privately-backed solar project. This initiative aims to cut power costs and reduce yearly greenhouse gas emissions by over

90,000 metric tonnes. Thus, they're heading towards a more eco-friendly future.

The Multilateral Investment Guarantee Agency (MIGA) issues a \$23.5 million guarantee to AMEA Power for the development of Tunisia's first large-scale privately financed solar power plant, supporting the country's renewable energy ...

The first solar photovoltaic system on the island Djerba, in south-eastern Tunisia, was inaugurated yesterday. Located in the Ajim delegation, this one megawatt plant will provide electricity to 500 homes and contribute to the North African country's strategy to reduce greenhouse gas emissions, according to the project promoter, Jamil Maamer. With an ...

The Concession Agreement and the Power Purchase Agreement were signed in June 2021 and ratified by the government of Tunisia in May 2022. This is the first solar project to reach financial close under the ...

It marks Tunisia's inaugural privately-financed solar initiative. "This groundbreaking project is a beacon for future renewable energy projects in the country, supporting the government's goal of achieving 35% renewable energy by 2030," stated Hussain Al Nowais.

So this evaporation of water in nations like Tunisia, which is water-stressed, certainly permits the dams to keep more water reserves, wrapped up the exec. In 2015 Tunisia collection ambitious targets for renewables yet last year eco-friendly resources accounted for just 2.8 percent of the country's energy mix and the rest originated from gas.
