Like most laptops, Dell laptops use lithium-ion batteries. One type of lithium-ion battery is the lithium-ion polymer battery. Lithium-ion polymer batteries have increased in popularity in recent years and have become standard in the electronics industry due to customer preferences for a slim form factor (especially with newer ultrathin laptops) and long battery life.

Household batteries come in two main forms: rechargeable and single-use. The extent to which each can be recycled depends on a variety of factors including battery type and materials able to be recovered from the recycling process. According to the U.S. Environmental Protection Agency:

Removable batteries: Removable rechargeable batteries can be brought to specialized battery recyclers, participating retailers that provide battery takeback services, or local household hazardous waste collection programs. Contact the manufacturer or your local household waste authority for other management options.

The 2017 Tuvalu Mini-Census CAPI questionnaires is divided into 2 sections: A household questionnaire which was used to collect information on all household characteristics (dwelling). A personal questionnaire administered in each household to all household members currently residing or away on temporary basis during census night.

Types of Household Batteries. Before diving into your purchase, it's important to understand the different types of batteries available. Alkaline Batteries. Pros: Alkaline batteries are cost-effective, have a long shelf life, and are widely available. They are perfect for low-drain devices like TV remote controls and alarm clocks.

Household batteries include single-use and rechargeable batteries in a variety of sizes (AA, AAA, 9v, etc.). The use of rechargeable batteries is recommended to reduce the number of batteries being disposed of each year. Modern-day alkaline batteries no longer contain mercury and are classified as non-toxic by the Environmental Protection Agency and can be disposed [...]
