

How many bees are there in Jamaica?

This renewal of interest is rather timely, in the context of both Jamaica's long history with beekeeping and the urgent threats to bee populations. There are estimated to be as many as 69 species of bees in Jamaica, with the NHMJ's zoology collection containing approximately 500 specimens across 40 of these species.

Is beekeeping a good idea in Jamaica?

An edited version appears below. With honey being the valuable product and amazing food resource it is, with proven anti-bacterial and sleep-inducing properties--not to mention its soothing and restorative qualities if you have a cold or the flu--beekeeping has been steadily catching on in Jamaica for some years now.

Where is Jamaica located?

Jamaica is an American country located in the central part of the continent, in the Caribbean Sea. It is the third-most populous Anglophone country in the Americas, but it used to be a Spanish colony as well.
