In 1962, SEC CARBON succeeded in commercially producing graphite electrodes with a 24-inch diameter, the world's largest size at that time. Since then, SEC CARBON has built inherent trust as a pioneer of large-diameter electrode production.

The push by Turkey's energy ministry to exploit domestic coal resources, as well as the close relationship between coal mine owners and the AKP, is at odds with any claims to be increasing action on climate change. Meanwhile, a governmental decree issued in 2016 provides exemptions from licences and permissions for fossil-fuel projects which have been defined as ...
