

What does Türkiye's energy minister say about a 'green grid'?

Türkiye to focus on renewables, upgrade of transmission infrastructure and energy efficiency improvements Türkiye's energy minister announced plans on Monday to invest \$10 billion in the electricity grid by 2030 with the aim of establishing a 'Green Grid.'

What is Türkiye's energy policy?

Türkiye's primary objective for the energy sector, as presented in the 12th Development Plan, is to maximize self-sufficiency by using domestic and renewable energy resources, based on the 2053 net zero emission goal, along with uninterrupted, high-quality, sustainable and secure supply of energy at affordable costs.

Does Türkiye have a coal lock-in?

Türkiye's 2022 National Energy Plan targets a further tripling or more of solar and wind capacity over the next decade to achieve 82.5 GW of total solar and wind generation capacity by 2035, adding around 60 GW between now and then. However, Türkiye has a substantial coal lock-in outlook, with a large pipeline of coal capacity (32 GW in 2020).

Will Türkiye need a battery or pumped hydro storage system?

Around 2030, Türkiye will need battery or pumped hydro storage to manage the increasing penetration of solar and wind and provide sufficient system flexibility.

Does Türkiye have a social assistance program?

Türkiye has mature social assistance programs to support poorer households, who tend to spend a larger proportion of their income on necessities like energy, so are often more sensitive to price increases.

Is Türkiye a carbon-intensive country?

Energy and carbon intensity, at 145 ktoe/US\$2015 and 440 g CO₂e/kWh respectively, are above the European Union (EU) averages (88 ktoe/US\$2015 and 229 g CO₂e/kWh respectively), while Türkiye's electricity production is now less carbon-intensive than the EU average.

Türkiye's new road map for renewable energy has received positive feedback in the sector, while nongovernmental organizations (NGOs) working in energy transformation and solar energy ...
