"Swimming pools and chocolate biscuits" have lower priority in case of gas shortage - grid agency. German grid agency head Klaus Müller says it remains uncertain whether Germany can reach its target to refill gas ...

As Russia's invasion of Ukraine entered its first winter in late 2022, nearly half of Ukraine's energy infrastructure had been destroyed, leaving millions without power. The resulting energy deficit has exacerbated something that hasn't had much media attention: The effects of electronic GPS jammers affecting vital electrical equipment.

Ukraine's Energy Security and the Coming Winter - Analysis and key findings. ... Kyiv, experienced its first unscheduled blackout since November 2022. Ukraine's air defences ...

This whitepaper reexamines the 2016 CRASHOVERRIDE event, highlighting how it attempted a different type of attack than 2015 by disrupting electric power operations only as an initial step toward setting up a protection-focused attack.

There is one mode of meddling that could hit closest to home: a possible attack on the American power grid. Three years ago, a group of Russian hackers by the working name of "Sandworm" were able to bring Ukraine to a standstill by shutting down its power grid through a type of malware.

Now, as temperatures drop, Russia stands accused of "weaponising winter." A cynical turn in the war Beginning in October, in the face of consistent battlefield setbacks, Russia has explicitly and systematically targeted Ukraine's power system; civilian infrastructure that is vital to keeping lights on and homes warm for the millions of Ukrainians as winter begins. A ...

What made Russia's conflict with Ukraine possible, even inevitable, was the West's lack of recognition for Russia's values and interests in Eurasia, on the one hand, and the critically important ...

Ukraine's power grid was being attacked relentlessly by bombs and cyberattacks alike. But those weren't the only problems with keeping the lights on. MARSHALL: And they were just going through a ...

The listening post in the Ukrainian forest is part of a C.I.A.-supported network of spy bases constructed in the past eight years that includes 12 secret locations along the Russian border.

finances, and reducing stress on the grid, but such benefits are largely incidental to other program goals, such as social welfare, environmental protection, and job creation. Recent congresses have enacted major legislation to fund investments in expansion, modernization, and hardening of transmission infrastructure to enhance resilience.

Putin was speaking hours after Russia launched a "comprehensive" strike on Ukraine's energy grid overnight, in what he called a response to "continued attacks" using US-supplied Atacms ...

coming this fall. Ukraine is a frontline state and testing ground for Russia's nefarious activities, and the West has an obligation to support Ukraine against such threats in its pursuit of a democratic, Euro-Atlantic future. Ukrainian Election Task Force Foreign Interference in Ukraine's Democracy The Atlantic Council, the Victor
