

What is the European Association for storage of Energy (EASE)?

The European Association for Storage of Energy (EASE) is the voice of the Energy Storage community by having over 40 members representing electric grid operators, utilities, research, academia, and industry. The association is actively promoting Energy Storage in Europe and worldwide.

How does ease support the deployment of energy storage?

EASE supports the deployment of energy storage to support the cost-effective transition to a resilient, climate-neutral, and secure energy system. EASE, located in Brussels, is the leading member-supported association representing organisations active across the entire energy storage value chain.

Who is ASE & why is it important?

organisations active across the entire energy storage value chain. cost-effective transition to a resilient, climate neutral, and secure energy system. EASE represents more than 50 members including technology suppliers, research institutes, distribution operators, and transmission system operators.

What are ease's energy storage policy priorities?

EASE members have defined policy priorities to take energy storage to the next level in the coming years. We call on policymakers to: prioritise energy storage support across all EU Green Deal files. implementation of the 'Clean Energy for All Europeans' Package, support faster permitting, and ensure monetisation for storage services.

How much energy storage does the EU need?

Over the next five years, the EU needs to achieve a mammoth 187 GW total installed storage capacity to keep on track. Of the 5GW currently under construction in GB, 3.5GW of this is set to come online in 2024 with pipelines continuing to expand into 2025. These are just some examples of the urgent need for energy storage deployment across Europe.

What is energy storage global conference 2024?

The Energy Storage Global Conference 2024 (ESGC), organised in Brussels by EASE - The European Association for Storage of Energy, as a hybrid event, on 15 - 17 October, gathered over 400 energy storage stakeholders and covered energy storage policies, markets, and technologies.

From a regulatory perspective, Hino says the United Kingdom, in particular, is a leading market because it has granular pricing policies and a significant amount of wind energy. The United Kingdom's government is targeting deployment of 30 gigawatts of ...

Azerbaijan's COP29 proposal urges a six-fold increase in global energy storage to 15,000 GW by 2030,

emphasizing battery storage while addressing sustainability, recycling, and ethical resource extraction. ... United Kingdom Energy and Natural Resources. Duncan White. ... European Ocean Energy Set To Become "A Massive Export Market"; United ...

In May, as the European Union (EU) launched REPowerEU, the energy storage industry's initial disappointment at being excluded from an early leaked draft of the document - which set out pathways to reduce dependence on Russian gas and accelerate decarbonisation - gave way to a more positive feeling.. REPowerEU in its final form did include mention of ...
