It claimed the UTE is planning to launch another solar PV tender in 2020. As of December 2018, Uruguay had 88.4 MW of solar power capacity in the grid it reported with other renewables being 1.5 GW hydro, 1.2 GW wind, 424 MW of biomass while the country's thermal capacity is 649 MW which BNamericas says Uruguay hardly uses.

In 2013, Uruguay launched a solar tender, aiming to contract around 206MW of photovoltaic utility-scale capacity to be delivered by 2015, divided into three ranges: less than 1MW, between 1MW and less than 5MW, and from 5MW to 50MW. As of November 2014, 16 PV projects, with a total capacity of 199MW, had been awarded contracts.

The electricity sector of Uruguay has traditionally been based on domestic hydropower along with thermal power plants, and reliant on imports from Argentina and Brazil at times of peak demand. Over the last 10 years, investments in renewable energy sources such as wind power and solar power allowed the country to cover in early 2016 94.5% of its electricity needs with renewable ...
