

This makes the DSG battery ideal for challenging utility switchgear applications. Its 0.25 inch positive grids are one of the thickest in the industry, making it an excellent long discharge battery and ideally suited for the complex duty cycle requirements of the switchgear application. The multi-cell construction helps to minimize floor space.

Allied Power Associates, LLC is available to the mission critical and telecommunications markets for the purpose of promoting batteries, battery service, and associated products in the New York, New Jersey, and ...
