

Is Oztek part of trystar?

To strengthen its presence in renewables market, industrial power products manufacturer Trystar, based in Faribault, MN, has acquired Merrimack, NH based Oztek Corp, a manufacturer of commercial and industrial power conversion and power electronics products. The acquisition deal was closed on May 5, making Oztek part of Trystar.

Who owns Oztek?

Oztek is now owned by Trystar, a US manufacturer of electrical power solutions. |Oztek, now part of Trystar, was founded in 1997 is a U.S. manufacturer and global provider of reliable, digitally controlled power converter solutions at affordable prices.

Why should you choose Oztek?

"Trystar is at the forefront of electrification, renewables, and power grid resiliency. Adding the Oztek products to our already extensive portfolio of electrical power products will allow us to create more complete, integrated solutions for our customers, particularly in wind, solar, microgrids, and battery storage applications.

What products does Oztek offer?

Presently, Oztek products include battery inverters and energy storage power conversion systems, bidirectional dc power supplies, printed circuit power supplies for motor drives and inverters, as well as silicon-controlled rectifier (SCR) controllers and firing boards.

Does Oztek still make power conversion systems?

According to Trystar, Oztek will continue to produce and expand its power conversion products offering for energy storage systems, with continued focus on compact, high-performing, long life solutions. It will now be called Power Conversion Systems Division of Trystar, said the buyer.

Why did trystar acquire trystar?

This acquisition is expected to accelerate Trystar's strategy to broaden our portfolio of electrical power solutions that we can provide our customers, and strengthen our capabilities in renewable energy and battery energy storage systems.
