This division is responsible for the administration of the NGEF, its loan disbursements and repayments including its normal operations. In addition, the division is also involve with the development of new financial products for implementation including compiling project proposals to raise more funds towards renewable energy and energy efficiency projects.

AIMS Power inverters, inverter chargers, solar panels and other electrical system accessories can create reliable sources of backup power that residents of Vanuatu need for safety and peace of mind. Vanuatu electricity is 230 Vac 50 Hz, but power outages are not uncommon due to extreme tropical weather and electrical systems that can be unreliable.
