

Where is the largest LNG terminal in Vietnam?

On 29th October 2023, at Cai Mep Industrial Park, Phu My town, Ba Ria - Vung Tau province, Vietnam National Oil and Gas Group (Petrovietnam) and its subsidiary Vietnam Gas Corporation (PV GAS) held the inauguration ceremony of the 1 million ton Thi Vai Liquefied Natural Gas (LNG) terminal, the largest LNG terminal in Vietnam.

What is Thi Vai LNG terminal?

In October 2023, Petrovietnam Gas Corporation (PV GAS) will inaugurate and put Thi Vai LNG Terminal into operation. This is Vietnam's first and largest LNG complex, with an average throughput capacity of 1 million tons per annum (MTPA), and a maximum one of up to 1.5 MTPA in phase 1. Completing the construction of Thi Vai LNG Terminal

Why is PV gas the most modern LNG facility in Vietnam?

Therefore, the terminal has become the most modern LNG facility in Vietnam, helping PV GAS meet the energy needs for national socio-economic development. To be more specific, it will be partly compensating for the declining domestic production, and addressing challenges faced in exploring alternative and cleaner sources.

How many MTPA can a LNG terminal hold?

Later on, the terminal underwent successful commissioning and now has been ready to come online. The complex features a LNG storage tank with a capacity of 180,000m³ and a throughput of 1 MTPA in phase 1, a truck loading station, Thi Vai- Phu My pipeline, and Thi Vai Low-pressure Gas Distribution Station.

What is PV gas' LNG infrastructure?

The largest LNG storage tank in Vietnam to date In addition to investing in the 1 MMTPA Thi Vai LNG Terminal, PV GAS has been looking into Son My LNG Terminal project with an expected total capacity of up to 10 MTPA. As a result, PV GAS' LNG infrastructure will fundamentally meet the energy needs of the Southern region in the future.

What is the height of a LNG tank?

The "heart" of the project is the LNG tank with a height of over 50m and an outer diameter of 82m, design temperature of -170/+65°C, in the form of "Full Containment". LNG tanks meet strict international standards such as AI620, ACI376 ...

An additional 30,000-cbm storage tank is planned for the latter part of the decade. In other news, Excelerate Energy's floating storage regasification unit (FSRU), the Excelsior, is set to support Germany's Wilhelmshaven 2 LNG terminal. The 138,000-cbm FSRU will be stationed at a new island jetty in Jade Bay, northwestern Germany, by late 2024.

Lilama 18 invested to enhance ability and equipment to implement the first lng storage tank project in vietnam
Published date: 24/04/2019 Signing the contract with Hai Linh Company Ltd., Lilama 18 JSC has become the first company in Vietnam to be responsible for fabricating and installing 03 LNG storage tanks with capacity of 219,000m3 in Ba ...

LNG Storage Tank. An LNG storage tank is a particular kind of storage tank used for the storing of liquefied natural gas. Storage tanks may be placed on, above, or in LNG ships. LNG storage tanks do have the capacity to ...

LNG storage tanks at regasification terminal About Us Witnessing the fast pace of development in the 1980, Mr. Ramesh Hira, HVAC Engineer from India, founded Hira Traders LLC in the UAE, with a strategic objective of distributing HVAC utility products in the Middle East.

The Terminal is strategically located near the Mekong River Delta and has a 220 000 m³ of LNG storage, and LNG break-bulk capabilities that allows it to reload LNG into smaller vessels. The Cai Mep Terminal initially set at 3 million tpy and expandable to 6 million tpy, has 14 truck-loading bays for LNG and CNG filling.

Tank Fabrication by VIVABLAST in Vietnam. Fabrication of storage tanks, particularly steel tanks, requires exceptional precision to ensure absolute safety when storing substances, from potable water to hazardous industrial chemicals. ... Oil and Gas: Storage tanks for crude oil, refined products, and liquefied natural gas (LNG). Chemical ...

CFC Vietnam acts as a distributor of reputable manufacturers specialized in equipment for industrial gas, oil and gas industry and high-pressure equipment. ... LNG/LCNG, Hydrogen, Petrochemical, Refinery, Oil & Gas Industry and many ...

Greek-flagged Maran Gas Achilles transported nearly 70,000 tonnes of liquefied natural gas (LNG) to the Thi Vai LNG terminal in Cai Mep Industrial Park in Tan Phuoc ward, Phu My town, southern Ba ...

CFC Vietnam acts as a distributor of reputable manufacturers specialized in equipment for industrial gas, oil and gas industry and high-pressure equipment. ... LNG/LCNG, Hydrogen, Petrochemical, Refinery, Oil & Gas Industry and many other related industries. ... Engineered Cryogenic Storage Tanks ; Mobile Equipment - Semi-Trailers and Rigid ...

We offer a complete range of standard and custom engineered LNG cryogenic storage tanks for a broad range of applications, including turnkey and custom systems for storage and regasification. Tanks from 11.35 m³ to 757 m³ are available in both horizontally and vertically oriented designs to accommodate specific customer requirements and ...

According to Vietnam's gas industry development plan, Vietnam will need to import one to four billion cubic

meters (m³) of LNG per year from 2021-2025 and that will then increase to six to 10 billion m³ per year by 2026. Earlier this year PV GAS signed a contract to import the first shipment of LNG into Vietnam.

In addition, there are plans for a second LNG storage tank of 30,000 cbm for the latter half of the 2020s as the expansion development. The facilities could commence commercial operation in 2025. In alignment with the project, ITECO is in discussions about LNG procurement as well as its offtake and distribution, Japex said. Vietnam LNG imports

THI VAI LNG 1 MMTPA Storage In Energy . Ba Ria ... The Owner of Project - PV GAS is one member of Vietnam Oil and Gas Group (PVN). Thi Vai LNG 1 MMTPA Terminal Project is invested by PetroVietnam Gas Corporation (PV GAS) with the capacity of 1 million tons of LNG/year in phase 1, expected to be completed by 2022, and the capacity of 3 million ...

The initial development plan included the construction of a 50,000 cubic meters (cbm) LNG storage tank, capable of handling up to 650,000 metric tonnes of LNG annually, and associated jetty facilities. An additional 30,000-cbm storage tank was planned for ...

LNG tanks or difficult to permit Satellite terminals for power plants These are single-use satellite terminals dedicated to supply a gas or dual-fuel power plant and include fuel storage and LNG processing systems in the size range of 100-20,000 m³. The storage is mainly built as bullet tanks and the capacity depends on

The LNG Storage Tank Market grew from USD 10.56 billion in 2023 to USD 11.68 billion in 2024. It is expected to continue growing at a CAGR of 10.43%, reaching USD 21.17 billion by 2030.
