The United Arab Emirates (UAE) is located in an arid region, which heavily relies on imported food as traditional agriculture techniques for growing foods are challenged by a severe lack of water and tough environmental conditions (Durgun, 2017). Sustainable agriculture is interlinked with the security of future food supply for the UAE.

Besides the UAE, Gulf Arab states utilized renewables at a rate of less than .5% of their total consumption in 2018. Significant progress stands to be made throughout the region, but the UAE is leading the pack. The Emirates" continued pursuit of renewable energy despite the Covid-19 pandemic has attracted investors and developers.

The United Arab Emirates (UAE) is known for its large oil and gas reserves, but since 2006, it has been involved in various unprecedented activities in the renewable energy sector. This makes it an odd case in the renewable energy map, which has been dominated by countries with a completely different energy portfolio.
