

Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Does Guatemala have solar energy?

Notably, Guatemala has seen previous ventures into solar energy, including the announcement of a 5 MW photovoltaic project in 2014 and a subsequent tender for a 110 MW project in 2019, which was later cancelled. As of 2023, the country had an installed photovoltaic capacity of 105 MW, according to IRENA statistics.

What is Guatemala's energy source?

This page is part of Global Energy Monitor's Latin America Energy Portal. In 2018, Guatemala derived 57.43% of its total energy supply from biofuels and waste, followed by oil (29.54%), coal (7.68%), hydro (3.22%), and other renewables such as wind and solar (2.12%).

What is the future of energy in Guatemala?

Competition with the possibility of developing cheaper energy sources, such as: hydropower & natural gas. The Guatemalan government has a plan of using geothermal power to supply for two thirds of the country's energy needs by 2022. Thus reducing oil imports and stabilizing the country's energy supply.

How much solar power will Latin and Central America have by 2050?

The PV capacity of Latin and Central America could reach 280 GW by 2050, according to IRENA. Image: BMR Energy Dutch clean energy developer MPC Energy Solutions has started construction of a 65 MWp solar project in Guatemala, and plans to commission the project by mid-2025.

Can biomass produce electricity in Guatemala?

Guatemala has a powerful agro-industrial sector with considerable biomass waste products, hence there is a large potential for generating electricity from agricultural biomass in the country. Guatemalan sugar mills already use their produced waste of biomass to generate electricity in the country.

Our experience with the installation of a photovoltaic solar energy system on our B& B at Lake Atitlan, Guatemala was filled with challenges. Some of the challenges stemmed from the newness of grid-tied systems in Guatemala. However, the vast majority of the challenges were the result of terrible customer service mixed with a big dose of ...
