

Where are Webasto batteries made?

Our battery systems are developed, tested and produced in the Webasto plant Schierling in Germany- so every battery meets the very highest standards. The thermo management solutions from Webasto shorten charging cycles, extend battery life and ensure pleasant temperatures inside the vehicle.

How many batteries will Webasto make a year?

The company targets manufacturing 110,000 battery modules a year and plan expanding to a capacity of 160,000 packs by 2025 in South Korea. Webasto has invested around 88 million euros in the location. Production in Dangjin started this April, now followed the official opening.

Is Webasto a good battery system for commercial vehicles?

The Webasto CV standard battery system is designed for the commercial vehicle market and offers robust packaging, automotive standard design, zero compromise quality and an efficient cooling interface. Coupled with Samsung SDI state-of-the-art cell technology, Webasto CV standard battery system is a perfect fit for commercial vehicles.

What is a Webasto CV battery system?

Designed for light, medium and heavy duty on- and off-road requirements, the Webasto CV standard battery system brings a off-the-shelf solution to reality. Modularity is our core design principle, with which we fit in your commercial vehicle application.

How do I find a Webasto dealer?

Our service and support platforms provide you with the right sales and installation partner quickly and easily. In addition, certified Webasto dealers can quickly access the dedicated Dealer Portal here. With the Webasto Dealer Locator, you can easily find the closest Webasto contact and directly request an offer for your favoured product.

In addition, Webasto systems can emulate any drivetrain component, enabling the testing of individual components or partial drivetrains accurately and realistically, allowing true hardware-in-the-loop testing. ...
