

Liebert DS, DS077A, 77kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced thermal controls and features a modular design, multiple compressor options and easy service access.

Liebert's CRV In Row Cooling System, 10-40kW. The Vertiv(TM) Liebert's CRV is a precision data center cooling solution, integrated within a row of data center racks and was designed to address some of the major challenges seen in high density applications. With adjustable airflow baffles and controls that independently manage airflow and ...

Liebert SiteScan allows monitoring and control of virtually any piece of critical support equipment -- whether located in the next room or in a facility on the other side of the country. This web-based data center monitoring system provides centralized oversight of Liebert precision air, power and UPS units, as well as many other analog or digital devices.

Liebert DS, DS053A, 53kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced thermal controls and features a modular design, multiple compressor options and easy service access.

The Liebert Mini-Mate2 is a zero-footprint computer room cooling system for 7x24 temperature and humidity control and air filtration. It installs above a dropped ceiling and is easy to service, requiring only front access for maintenance.

Liebert CRV air-cooled system uses environmentally friendly R410A refrigerant and is available in two widths and in multiple capacities. [Print Download Email](#). CR020RA, Air-Cooled, 20kW. Product Specifications Total Nominal Capacity kBtuh [kW] 68.2 [20] Net Sensible Capacity kBtuh [kW]* 82.9 [24.3] Nominal Airflow [CFM]

Electric Reheat, Infrared Humidifier Microprocessor Control system automatically selects the most precise action based on the environmental trends of your site Liebert brand name- the gold standard in industrial ACs Start-up- We also ...

Liebert DS, DS042A, 42kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced thermal controls and features a modular design, multiple compressor options and easy service access.

The Liebert® CW system combines the latest innovations in coil, valve and controls technologies for optimal protection and efficiency. Units in 440kW capacities significantly reduce the cost of deployment and maintenance and improve energy efficiency through an optimized chilled water coil design that can utilize higher entering water temperature (EWT).

Liebert DS, DS070A, 70kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced thermal controls and features a modular design, multiple compressor options and easy service access.

The innovative Liebert® CW system lets you rapidly deploy chilled water capacity, achieve higher efficiency and use less white space. It offers the industry's widest range of capacities, featuring the industry's most advanced controls and ...

Overview Liquid Cooling Options for Data Centers Battery Energy Storage System Transitioning to 5G Lithium-ion Technologies UPS Types What is a Rack PDU The Edge Revolution Vertiv Data Center Security Solutions Customer Case Studies Edge eBook Series Hydrogen Fuel Cells Vertiv Continuing Education (CE) Program Condition-Based Maintenance ...

The Liebert® PEX+ is designed as a modular-type room-based precision cooling system for IT critical equipment that requires high level of sensible heat elimination, precise temperature and humidity control. ... The Liebert® PEX+ is designed as a modular-type room-based precision cooling system for IT critical equipment that requires high ...

Liebert DS, DS070A, 70kW. As the world's most flexible and reliable direct expansion data center cooling system, the Liebert DS improves data center efficiency and protection. The system uses the industry's most advanced ...

The Liebert DataMate is a split-system evaporator available in combination with a remote air-, water- or glycol-cooled condensing unit or a close-coupled water/glycol-cooled condensing unit, or as a self-contained, chilled water unit. Models are available to fit small computer rooms, requiring only five square feet or less of floor space, or can ...

The Liebert Mini-Mate2 is a zero-footprint computer room cooling system for 7x24 temperature and humidity control and air filtration. It installs above a dropped ceiling and is easy to service, requiring only front access for maintenance. ... Vertiv(TM) Liebert® Mini-Mate2 System Design Catalog SL-10525 ; Liebert® Mini-Mate2 2 and 3 Ton System ...
