Is it time to install solar panels in the Manx?

Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity). There is something very satisfying about receiving an energy bill from Manx Utilities which is not only zero, they might pay you because of excess energy sold to the grid. There has never been a better time to install solar.

How reliable are solar panels?

Solar panels convert the light from the sun into electricity, with no moving parts they are very reliable a 30 year life is realistic, that means with payback averaged at 9 years, you can have 21 years of free electricity! Even on a bright Manx winters day a panel can generate a considerable amount of electricity (perhaps 30% of capacity).

Solar PhotoVoltaic (PV) Panels Each and every day our Sun emits endless amounts of power, shining right where you need it most on your home or business roof, or adjoining land. There are many reasons to tap into this otherwise wasted power.

# Which type of solar panel is best Isle of Man

Planning permission is being sought to put the solar panels in seven sets of 100. The roof would be made of sheet metal, bonded to insulation, which allows solar panels to be installed more easily than if it was on traditional slate. The application is currently pending consideration and can be found [here](#).

Manx Utilities (MU) will look to install solar panels on public car parks and government buildings. Wind turbines could also be built on public land to create 30MW of electricity by 2026.

The type of solar panels. 3. There are two main types of solar panels - monocrystalline and polycrystalline. Monocrystalline panels are more efficient at converting sunlight into electricity, but they are also more expensive than polycrystalline panels. The type of panel you choose will impact the overall cost of your solar panel installation.

The best type of solar panel overall is monocrystalline, as it achieves the best peak power output, efficiency ratings, and break-even point, all while looking good. However, perovskite solar panels are coming for its crown. When they're widely available, they'll revolutionise the market - and your electricity bill savings.
