We promise to provide opportunities to maximize your ability. Our employees are passionate, dedicated and proud of their work. Please join us in making a better ...

A power system model for Saudi Arabia was built to quantify the carbon emission implications of deploying electric vehicles (EVs) within the Kingdom. The model represented the four operating regions in the Kingdom as segmented by the electricity regulator. The model simulated 18 scenarios. These scenarios stemmed from varying the number of EVs

The project - the first in-Kingdom project of this scale with a project proposal completed entirely in Saudi Arabia - also included a gas-oil separation plant, 140 kilometers of 16" gas pipeline, and water supply facilities at Hawtah. ... advanced control and power systems, robotics, materials science, nanotechnology and advanced ...
